DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15, drawn to an electrodeposited laminate.

Group II, claim(s) 16-17, drawn to methods for producing multilayer copper clad laminates.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

- The common feature of a laminate comprising a carrier foil, bonding interface, copper foil, and resin layer cannot qualify as a special technical feature as it does not provide a contribution over the prior art because it is disclosed by JP2000-43188 and WO 2002/024444 (see the international search report).

For example, JP2000-43188 teaches a carrier foil 2, a bonding interface 3, a copper foil 4, and a resin 5. Therefore, the reference(s) specifically suggests using the common elements as claimed. As such, the common feature does not qualify as a special technical feature.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
